Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to choose the best crop for my land. • I need accurate recommendations based on my soil. • I want to increase my crop yield and income.	THINKS • Which crop will grow best in my field? • Will the weather affect my harvest? • Am I using the right nutrients and fertilizer?
PERSONA <i>(Farmer)</i>	
DOES • Worried about crop failure. • Confused about selecting the right crop. • Hopeful that technology can improve productivity.	FEELS • Checks soil conditions and weather reports. • Consults agricultural experts or experienced farmers. • Compares different crop options before planting.
