Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

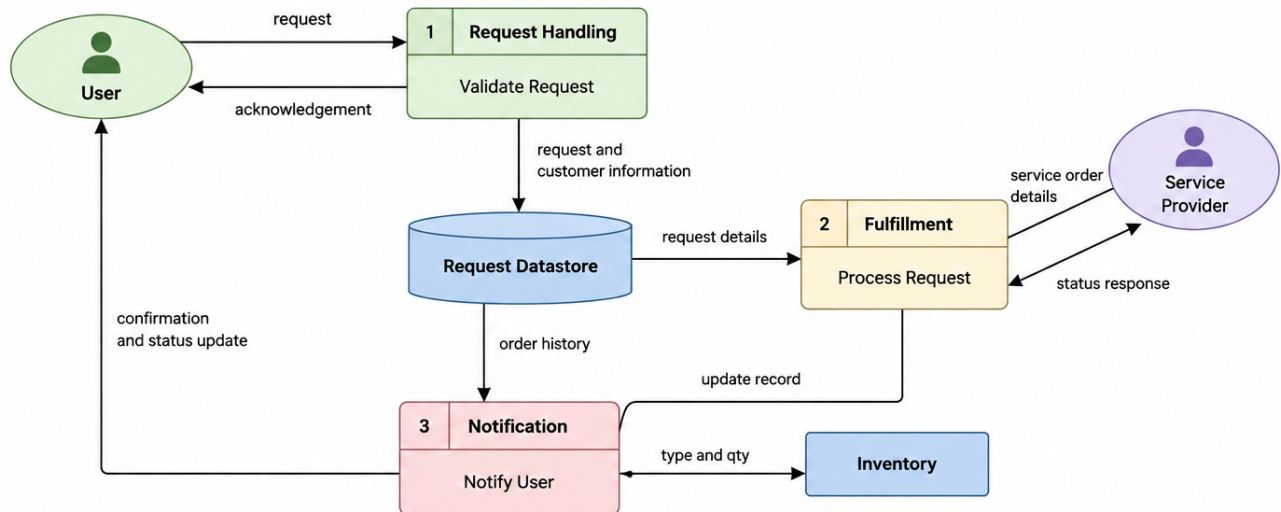

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

DATA FLOW DIAGRAM

OptiCrop: Smart Agricultural Production Optimization Engine

Legend:

	Process 1		Data Store
	Process 2		External Entity
	Process 3		External Entity

Process Description

1. Request Handling – Handles user requests and validates the input.
 2. Fulfillment – Processes the request and communicates with service provider.
 3. Notification – Notifies the user and updates inventory records.
- Data Store** – Stores all request and order related information.
- External Entities** – User and Service Provider interact with the system.
